The CSSUR Policy and Alignment workgroup will enhance policies, systems, and environmental changes both internally as a coalition and externally within our community. Our workgroup will focus on policy changes that follow our mission to reduce harm, increase safety, and support recovery through community-based solutions for those impacted by substance use.

Our work will also examine the substance use disorder continuum of care. We will identify gaps in the system and assess where changes could be made to more effectively serve our fellow community members.

How do we look at equity and inclusion?
